Job ID 3037

About client:

Our client Specialises in a variety of areas including plumbing, HVAC & mechanical services, fire services, civil & excavations and design. The company has made its name in the building and construction industry as being a company that offers exceptional reliability and worth, whilst always maintaining the highest regard for safety and consistency in every job undertaken. The company group are are involved in major construction and civil projects throughout the Sydney Metropolitan area with leading builders and developers. The scope of our projects is varied including multi-storey apartment buildings, residential cottages, commercial complexes, office buildings, shopping centres and aged care facilities.

The ideal candidate will have at least 3 years' experience in designing and developing Web, iOS or Android or both types of mobile applications.

If you are passionate and committed to doing your best and would like to be part of our winning team read on.
- Your chance to make your mark and be a part of a fast growing company.
- Work on innovative and challenging projects - varying market segments.

About the Role:
- Primary purpose of the role is to develop and maintain our mobile and/or web applications.
- The ideal candidate will have at least 3 years' experience in designing, developing, deploying and supporting Web, iOS or Android mobile applications.
- You will need to be able to showcase your work that is already in the App Store/ Google Play Store.
- Ability to be on-site and work with our team on a consistent basis. There is some opportunity for remote work and we are flexible with schedules but typically you will be in the office alongside the team.

Skills:
- Specific technical experience in: native app development and deployment for iOS and Android; RESTful API integration; test automation; Git/Bitbucket
- Solid programming experience in Objective C, Swift, and Java.
- Ability to build well-optimised and scalable mobile applications.
- Exposure to industry-standard approaches in designing secure high performance mobile applications.
- Ability to understand business requirements and translate them into technical requirements.
- Familiarity with cloud message APIs and push notifications.
- Experience in hybrid app technologies and/or web application frameworks
- Excellent problem-solving skills; experience in troubleshooting and resolving issues in complex, large-scale technology environments

Non-Technical Skills:
- An excellent work ethic and can do attitude.
- Attention to detail.
- A talent for communicating ideas, issues and solutions in a team environment.
- Exceptional English (verbal & written).
