

Job Opportunity for Scaffolding Engineer in Leam Chabang, Chonburi, Thailand (Job ID 3135)

Our Client:

Our Client is one of the largest oil service companies in Northern Europe and is also well established within the renewable energy sector. Our Client's scope of services includes planning, engineering, construction, upgrading and maintenance of platforms, vessels and production facilities in the oil and gas industry and they are offering successful candidates the opportunity to join their operations in Thailand on very interesting assignments in an informal, dynamic environment. They also offer a wide range of social events and competitive benefits in a friendly working environment with good possibilities for professional and personal development.

Employment Status: Permanent
Working Time: 08:00 - 17:00 PM.
Working Days: Monday - Friday

Qualification:

- Bachelor of Engineering
- Minimum 5 years of experience in Onshore/Offshore Oil & Gas or related industry

Responsibilities:

- Designing and preplanning of the scaffold including weight limitations, scaffold type, fall protection, tie-offs, supports, etc.
- Overseeing the erection of the scaffold
- Final inspection of the scaffold prior to initial occupation for use.
- At a minimum, daily inspection and documentation of the condition of the scaffold and its ability to be occupied safely.
- Inspection of scaffolds after changes/alterations have been made.
- Oversight and inspections of mobile scaffolds.
- Training of other competent persons, scaffold erectors, and users.
- Erecting scaffolds in accordance with local, state, and federal. Erectors also must abide by all manufacturer recommendations and be capable of erecting scaffolds under the guidance of a competent person.
- Inspecting all scaffold components prior to assembly to insure that components used are of similar material and in good repair before becoming a part of the completed scaffold. This includes (but is not limited to): mudsills, screw jacks, frames, braces, planks, access ladders, brackets, etc.
- Maintaining fall protection requirements while erecting/dismantling scaffolds.
- Providing a scaffold to the user that is free from recognizable and preventable hazards (i.e. fall protection systems in place, falling object prevention in place, appropriate access/egress to and from the scaffold, appropriate anchorage and stability of the structure, appropriate walking/working surfaces, maintaining appropriate clearances from electrical hazards, etc.)
- Prior to occupation scaffold erectors must notify the competent person that the scaffold has been erected and is ready to be inspected.
- Training of other scaffold users if needed.
- Contacting EHS if there is a concern regarding the erection of the scaffold.
- Contact EHS for assistance and guidance in any of the duties associated with being a Competent Person.
